# FAQs

## **How long does it take to build a website?**

This depends on the complexity of the website, but typically between 4-8 weeks.

## **How much does a website cost?**

Prices start from £350 for a 1-page website.

## **What content do I need to provide you with?**

Text, photos, company logo, social media links and any videos. Additional services (e.g. photography, copywriting, logo design) can be provided by my trusted partners.

## **Will I be able to edit the website myself?**

Yes. If required, I can arrange a session to demonstrate how to make the edits.

## **Do you offer a maintenance service?**

Yes! I can provide you with a number of hours of support each month if you need ongoing help with your website.

“

The final product is sleek, clean and professional looking. Sybil listened, did not impose a 'manufactured easy to do template' webpage on us. She managed our expectations beautifully and delivered a service which is best characterised by 'above and beyond'. Sybil simply delivered; she certainly commits her knowledge, skill and innovative entrepreneurial mind to benefit for her customer.

***Dr Zita Stone, Founder, NeroWireArt***

<https://nerowireart.com>

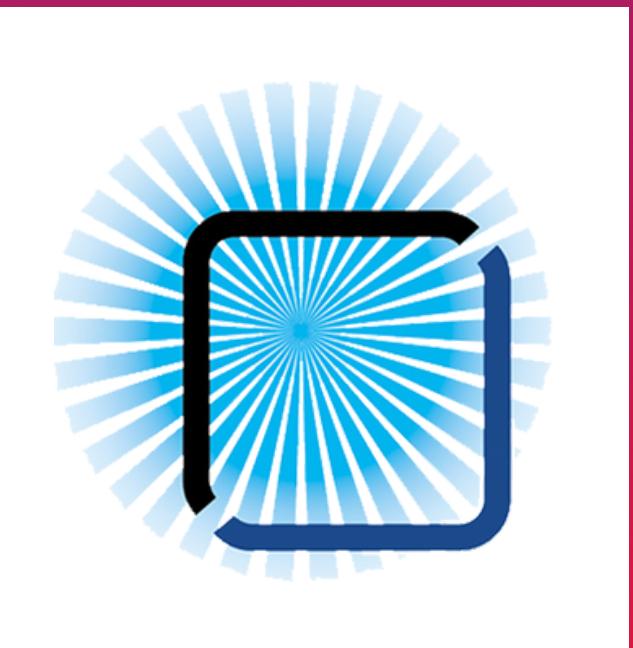

“

I have been working with Sybil for some time now on a range of digital service projects. I would recommend her; she is hard working, highly skilled and manages to communicate digital service issues in a way that makes them jargon-free and understandable. She has delivered all the work she has taken on for us within the agreed timescale and within budget. Her work is of a high quality.
